Re: Plant tour

Dear Mr. Wilcox:

I wanted to thank you for taking time to show me and my staff your facility yesterday especially considering it was out of your scheduled open house time. It was good to see the NEXT beam actually in production. Additionally your new addition is very nice and you and the people in the plant were a pleasure to speak with.

Once again thank you and wishing you and your company continued success.

Sincerely,

Paul J. Carrara, Jr.

Subject: RE: NEXT Beam Dwgs

Lee,

Thank you very much for giving us a tour of your facilities. It was very informative. Nothing can compare to seeing the actual production of what your designing. There are always details that are missed while sitting at a desk designing without seeing the real thing. Keith and I appreciate the extra time that you spent with us, and the time that you took to answer all of our questions.

We were very impressed and I am sure that we will be in touch in the future.

Thanks for the drawings too, they will be very helpful.

Thanks,

Adam
